*The Subtle Act
of Raw and Solid.*

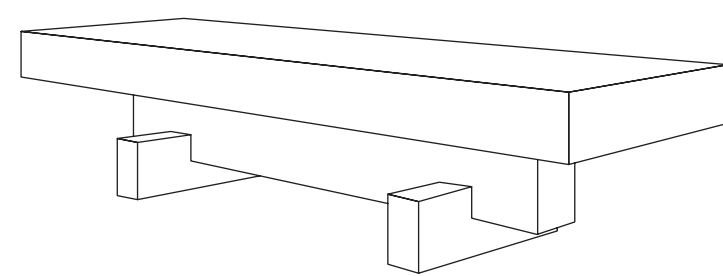

TOUGH

NOTHING CAN BREAK US APART

**STRONG
TOUGH
TOLERANT**

The desire for the furniture piece to last, TT introduces our first "TOUGH" bench to embrace the solidness and longevity of the wood. Differing from typical gluing on the edge of the wood planks to create the wider panels, we purposely face up the thinner sides of the planks, choose each plank, flip and shuffle until the colors and grain patterns look natural and pleasing. We join all the planks on the wider sides of the planks to form the strength and structural integrity of the timber.

If things get tough, remember the journey you started together They don't last because of the good times; they last because the hard times were handled with love and care.

TIGHT

HOLD ONTO ME TIGHT,
ALL OF YOUR BROKEN PIECES WILL FIT BACK.

To appreciate the wisdom of the thousand-of-years joinery techniques, TIGHT bench illustrates the method of joining wood pieces together with no use of any metal fasteners. The character of the piece emphasizes on the interlocking patterns, contrasting tones, and tightness of fitting-joint.

The precise cut and human-craft are carefully assembled to honor the ancient wood-working technique.

W66

BEING 12 CENTIMETERS WIDER AND DEEPER SEAT THAN USUAL
TO ADVOCATE ITS OVERSIZED QUIET SILHOUETTE DESIGN

W66 – Being 12 centimeters wider and deeper seat than usual chair, the W66 features relaxed comfortable seat with its oversized silhouette and quiet design. We explore the possibility of the solid wood materials and rather modern expression design to echo the coexistence of timber and its timelessness feature. A simple touch of grainy texture and matte black without metal screw reveals its inconspicuous personality.

SCAFFOLDING CHAIR

THE SCAFFOLDING CHAIR BRINGS OUT THE NEW PERSPECTIVE TO HONOR THE STREAMLINED SILHOUETTE, VISUALLY CLEAN, AND ORGANIC FORM THAT CAN CARRY THE WEIGHT OF THE HUMAN BODY.

Scaffolding Chair: The simplicity and humility of scaffolding-like structures and elements in the construction site is often seen and relating to us, but alas, its temporary structure is perceived and destined to serve only heavy-duty function. Most of our hardwood species shared similar destiny. The scaffolding chair brings out the new perspective to honor the streamlined silhouette, visually clean, and organic form that can carry the weight of the human body.

AA DESK

THE GRAPHICAL REPRESENTATION OF LETTER A AND ITS CROSSBAR BELOW ITS MIDPOINT GIVES A SENSE OF BALANCE AND STABILITY.

The graphical representation of letter A and its crossbar below its midpoint gives a sense of balance and stability. Letter A does resemble a man standing balanced on both feet in a confident form expressing its symbol of "Affirmation" and "Accomplishment" in all things. A-shaped made thinner legs possible to hold the weight of solid-wood tabletops steadily.
